Description

Immerse yourself in stunning 3D surround sound with the SR6011 AV receiver featuring Dolby Atmos and DTS:X surround decoding. Both Dolby Atmos and DTS:X feature object-based surround sound with the ability to drive overhead speakers to deliver the ultimate immersive 3D audio experience.

To enjoy the immersive 3D sound with all ease the SR6011 is equipped with 9 channel amplification, which means you can setup a 7.1.2 or 5.1.4 3D experience without the need of external amplifier. By the use of an external amplifier the setup can get extended to 7.1.4 as the SR6011 features 11.2channel processing. If not in use for 3D audio the integrated amplifiers can get assigned to drive another pair of speakers in a second audio zone running a different source than the main room.

Prepared for the future, the SR6011 features an advanced video section that's fully compatible with the latest HDMI 2.0a and HDCP 2.2 specifications on all 8 HDMI inputs. With 4K Ultra HD 60Hz video, 4:4:4 Pure Color sub-sampling, High Dynamic Range (HDR), 21:9 video, 3D, and BT.2020 pass-through support on every input, the SR6011 is ready for 4K Ultra HD Blu-ray disc players, set-top boxes and other 4K Ultra HD sources. In addition, the SR6011 can upscale standard and high definition analog and digital video content to 4K Ultra HD, breathing new life into your favorite legacy sources.

Full wireless connectivity is provided by both Wi-Fi and Bluetooth, with dual antennas that help ensure robust signal transmission and reception. Stream your favorite music through AirPlay, Spotify Connect or local network storage drives. High resolution audio formats and playback are fully supported for incredible fidelity.

The SR6011 features high grade audio components that have been carefully selected. The whole internal circuit further enhances audio quality by delicately handling all signals via the Marantz-own HDAMs (Hyper Dynamic Amplifier Module) in Current Feedback topology before passing them on to the power stage to fire up the connected speakers.

The powerful amplifier section features discrete high current output devices on all 9 channels, and all amp channels are configured identically. Rated at 110 watts per channel (8 ohms, 0.08%, 20Hz~20kHz), the SR6011 has the ability to drive lower impedance 4 ohm speakers on all channels. The "Marantz 2016 AVR Remote" app is available from the Apple app store, googleplay, and the Amazon appstore to control the receiver from your phones or tablets.
