Description

Crestron roller shades support both manual and motorized shading options for projects of any size

Crestron Roller Shades are the perfect solution. They're ideal for a flat clean look or in conjunction with more decorative drapes. Roller shades are available in widths up to 15 feet to meet the requirements of any project.

- * Clean Flat Shading Solution in Transparent, Translucent or Blackout Fabrics
- * Fit any window up to 15 feet wide
- * Dual shades provide a beautiful view or blackout at the touch of a button
- * Curtain walls: couple up to six shades as a single group with one Crestron QMT™ motor
- * Extra-wide shade option: includes larger tube and bracket size to support shades up to 15' wide
